

Explaining Embryo Adoption to Your Patients

YOUR GOAL: HELP YOUR PATIENTS ACHIEVE PREGNANCY AND CHILDBIRTH!

Frequently you achieve your goal, but sometimes treatments do not work. We want to empower you to give your patients each option and every hope.

Infertility can be overwhelming. Your patients need your help in determining their next steps.

COULD THEIR NEXT STEP BE EMBRYO ADOPTION?

3 tips

FOR SPEAKING TO YOUR PATIENTS ABOUT EMBRYO ADOPTION

1. Snowflakes is best suited for couples looking for an affordable way to achieve pregnancy and for those who want detailed information about the embryo donor.

2. Embryo adoption is an excellent option for couples needing to use donor egg/sperm. 50% of all donated embryos were created using donor egg/sperm.

3. Adoptive parents receive all the embryos of their donor match, allowing them the opportunity to give birth to genetic siblings or have multiple FET attempts.

Answering the top 4 questions about embryo adoption

Are embryos available?

YES! Snowflakes has embryos waiting for adopting families.

How long does it take?

The process takes, on average, **8-12 MONTHS** until your patient is scheduling their FET.

How much does it cost?

Snowflakes' program fee is \$9,000, plus the cost of the home study and a Frozen Embryo Transfer (FET).

Are there a variety of ethnicities available to adopt?

YES! Embryos of all ethnic and mixed backgrounds are placed for adoption.

THE TOTAL AVERAGES \$15,000

snowflakes®
embryo adoption program

The experts at Snowflakes have successfully helped more than 1,000 families use an adoption model to be matched with remaining embryos from IVF.

In 1998, the first ever Snowflakes baby, Hannah, was adopted as an embryo.

Since that time, 750+ babies have been born as a result of embryo adoption.
