

FIVE UNIQUE BENEFITS

Snowflakes® Embryo Adoption

YOU HAVE A VOICE

Embryo donation & adoption is a personal and emotional decision. Our team of experts will listen to you and hear your desires in an adoption match. The placing family provides up to 3 generations of medical history for your peace of mind. We will help you establish preferences that will set you up for success in our personalized matching process.

NO HIDDEN FEES

Our all-inclusive fee leaves nothing to the imagination. No confusion about what is or is not included in your adoption services. Matching - including a robust pool of placing families, contracts, shipping, inter-family communication assistance and permanent records storage, all provided by a caring and knowledgeable team.

LARGER EMBRYO SETS

Many programs only allow you to receive 1 or 2 embryos per match. At Snowflakes we keep larger embryo sets together. This allows you to have multiple transfers without having to incur fees for additional embryos, which also enables your child to have siblings! Our goal is to limit the number of families using embryos from the same set.

SPEED OF PLACEMENT

The more quickly you complete your program responsibilities, the faster you will move into matching. The matching phase averages less than five months for both placing & adopting families. We work with 40+ fertility clinics in the U.S., moving you forward toward your frozen embryo transfer and pregnancy.

FOCUS ON THE CHILD

Placing parents want to give their embryos an opportunity to live a full life. Adopting parents want to bring an infant child into their family to love. Snowflakes focuses on supporting all families using a true adoption model that places the children's best interests at heart. Over 1,000+ babies have been born into loving families through Snowflakes.
